PROJECTS

My Portfolio[HTML5, CSS-3, JavaScript (jQuery, VanillaJS, ParticlesJS)]

August 2021

- **Motivation:** It was difficult for everyone to find all of my works, experience's or tech-stacks at one place. So I came up with building my portfolio
- **Extra's:** I've also used some 3rd parties services like **tawk.to service** to monitor page visits and live chat.

Learn With Fun[ReactJS, ParticleJS, API, Firebase]

February 2022

- **Problem:** It's difficult to find some quiz application to practice questions based on the latest technologies like- DevOps, Linux, etc in a fun manner.
- **Solution:** This web application can help us to overcome this problem and we can learn with fun.

JustSpeak[HTML5, CSS3, JS(Node+vanilla), firebase]

December 2021

- **Problem:** Sometime it becomes difficult to manage different kind of transcript work.
- **Solution:** This web application can help to overcome from these problems and user can send the entire transcript to their email, cross verify long notes, etc
- With the help ALAN-AI voice assistant, disabled person can also use the application.
